

Broadcaster 1

ENGINE REMOTE CONTROL SYSTEM

Pump

Tanker

Sprinkler

Up to 3km for Drag Hose, or +500m for Tankers

- Control your pumping tractor or engine **BY REMOTE CONTROL** from the tanker or drag hose driver's seat
- Monitor pressure at the pump and signal strength in real time
- Fill your tanker at a more convenient location away from the pump by moving the hose across fence lines or around buildings
- Save time with easier "drive through" fill ups, cut fuel costs, and reduce load cycle times
- System supports up to 5 tankers
- Reduce labour costs
- Control PTO—On/Off
- Engine and PTO RPM feedback
- Ramp down RPM into corners and up out of corners
- And More!

Using the Broadcaster 1 = More Pumped Gallons per Hour at Lower Cost per Gallon

Silage Blade Packing Roller Combo

Check Out Sunova WorX
NEW Patent Pending
Silage Blade Packing Roller Combo

Push, Layer, and Pack Silage in 1 Single Pass!

Packing Roller

- In combination with the duals of the tractor you can pack the full width of the tractor in 1 single pass
- NOW you can pack to the end wall of the bunk instead of leaving the last 12' unpacked
- Semi Auto programmable roller preset pressure control, transfers a portion of the weight of the tractor to the roller Accurately and consistent.
- More acquired layer control
- Be able to always pack the centre on narrow bunks

Wings

- Forward and back folding wings, allows the tractor tires to get close to the side walls
- Gives more maneuverability when close to the side walls
- Great for narrow bunks to finish up the crown of the pile

Blade

- Very good visibility
- Folds up nice and tight for road transport

Gain Time and Save Fuel While Maintaining Packing Capacity
